

Check valves VBNF

Check valves VBNF

Key features and product range overview

Features

- Minimal height
- High flow rate
- Can be rotated horizontally through 360° in assembled state
- Actuation direction **1** can be changed by repositioning the housing

Note

The following sequence must be observed when assembling the individual components:

- 1) Press thrust ring **2** into the housing until it fits tightly.
- 2) Insert hollow bolt **3** into the opening.
- 3) Push sealing ring **4** over the thread of the hollow bolt.

Technical data

Piloted non-return function

- - Standard nominal flow rate
260 ... 620 l/min
- - Temperature range
-10 ... +60 °C
- - Operating pressure
0.2 ... 10 bar

The check valve VBNF-LBA is a valve with a piloted non-return function and a manual exhaust function. The piloted non-return function can be

used for a temporary intermediate stop. If a pilot signal is applied, the exhaust air can escape. If no pilot

signal is applied, the valve shuts off the exhaust air from the drive and the drive stops temporarily.

The integrated manual exhaust function can be used to manually vent a pneumatic drive.
